Rethinking products for a more sustainable future

Act for Green® is Somfy's voluntary initiative, which aims to reduce the environmental impact of products all along their life cycle: from the extraction of raw materials to end of life.

The Power of Somfy

We provide the right components and product solutions to work with any manufacturer, any fabric, any style, and any power system. Somfy products integrate seamlessly with most third-party control systems, for virtually unlimited flexibility. Our commitment to quality, continuous product innovation, and dedicated service and support have made Somfy the choice for thousands of manufacturers, dealers, installers, designers, and end users.

Somfy's Mission

For over 50 years, Somfy has been making life easier for millions of people around the world by providing intelligent home and building management solutions. Somfy innovates to automate and connect shades, blinds, draperies, awnings, rolling shutters, exterior screens, and pergolas by placing the end user at the heart of its concerns. Somfy is committed to creating reliable and sustainable solutions that promote the best way of living and well-being for all.

Make Your Sales More Dynamic

Take advantage of valuable Somfy information resources, training programs, marketing support, and point-of-sale material. Our regional representatives are at your call to help you offer your customers complete residential and commercial solutions. Working together, we aim to deliver mutual growth for both Somfy and your business.

Partnership Builds Greater Success

With Somfy by your side, you have all the support resources that you and your team need to elevate your business. Somfy will partner with you to customize solutions for any project and provide a host of helpful tools to simplify your work on-site. Our specialist teams provide step-by-step support, so you can complete the installation on-time and on-budget. Our service team can assist you in real-time by phone, text, or email if the need arises. The result: greater productivity, greater sales success, and greater business growth going forward.

Customer Satisfaction Is Our Priority

To ensure that your customers and your teams always get the logistics support they need, we offer a wide range of in-stock products and special-order products with short delivery periods. And we stand by our products with a longstanding commitment to customer satisfaction, as promised through our five-year limited warranty.

At Your Service

We are here to help you over the phone, via email or in-person at our offices during regular business hours. The SomfyPro website (www.somfypro.com) offers a vast assortment of product information, news, support tools, and answers to common questions.

Somfy Technologies

Somfy technology solutions are designed with simplicity in mind. Installed products powered by Somfy motorization offer quick and easy installation and seamless integration with home or building networks.

Technology Options

We offer a variety of advanced, easy-to-use, and easy-to-install motorized solutions with a solution to fit every end user — residential or commercial — no matter their needs or budget. Somfy motors are designed to fit the most common interior and exterior window treatment applications.

Wired Technology

The cost-effective standard solution. Typically used for applications requiring small to large torque ranges in new construction or retrofits where wiring can be run without difficulty.

Somfy Digital Network™ (SDN)

The precise solution where exact positioning is required. The motor's increment encoder measures the specific position and sends bidirectional communication to the controller.

Power-Over-Ethernet (PoE)

A low-voltage power distribution and network-connected solution that utilizes PoE (Power over Ethernet) technology to power and control shades and draperies.

Radio Technology Somfy® (RTS)

A good solution in existing construction where pulling wires is difficult, mainly used in residential and small buildings. Radio frequency transmitters and accessories control the RTS motors without the need for wired controls.

Zigbee® 3.0

Zigbee technology is a leading-edge solution that allows seamless connectivity and integration of various smart systems within the home, and simple control from a single source. It enables two-way communication, so users can send commands to their motorized devices and receive real-time status feedback. Somfy's Zigbee 3.0 products deliver a comfort-driven ecosystem, built for everyone.

Communication & Control Options

Somfy-powered solutions are available for all types of systems, offering flexible control based on user input, programmed settings, or present conditions.

TOUCH CONTROL Input provided via wall switches, touch screens, and hand-held remote controls.

A range of touch control options available to fit aesthetic and functional preferences.

WEATHER/SUNLIGHT/WIND SENSORS

Automatically detect conditions and activate functions in real time.

TIMER SETTINGS User programs automatic actions based on time of day throughout the year.

APP & VOICE CONTROL Allows voice-activated functionality using TaHoma®

AUTOMATED Can integrate with most automation and control systems or leverage building automation options from Somfy.

Over 50 Years of Somfy Innovation

Put our long history of product innovation to work for you. After all, who knows what tomorrow will bring?

1969 Somfy develops our first tubular motor, ushering in a new era of motorized blinds, screens, roller shutters, and awnings.

1981 Somfy launches "Somfy-matic," the first weather-controlled awnings and shutters.

1997 Radio Technology Somfy (RTS) is introduced, allowing convenient operation by remote control.

2007 Somfy introduces the Somfy Expert program.

2015 Somfy myLink is introduced, allowing the first app-based control via smart devices.

2018 "So Open with Somfy" program opens our APIs to integration partners for even greater flexibility.

1977 Somfy Systems, Inc. is formed.

1988 Our Canadian office opens in Toronto.

WireFree™

2002 Somfy introduces WireFree™ technology.

2012 Somfy produces our 100 millionth motor!

2016 Our first embedded Lithium-Ion battery motor in the Sonesse® range.

TODAY Open connectivity and integration with third parties like Amazon Alexa, Zigbee, Google Assistant™ and more.

Somfy in the USA & Canada

OEMs, dealers and installers in North America can easily access Somfy's professional partnership programs, support tools, product information, and training to help provide complete solutions with greater efficiency and customer satisfaction.

SomfyPro.com

The SomfyPro website serves a community of professionals who offer complete Somfy solutions with expertise and confidence. SomfyPro gives you access to product information, training resources, and tools to help you increase sales opportunities and deliver greater satisfaction for your clients.

SomfyPro puts a wealth of resources at your fingertips, anytime:

- Online Product Catalog and Document Library
- Product manuals, installation instructions, and sell sheets
- How-to videos
- Software/tools
- Somfy news

SomfyPro also offers you the opportunity to interact with Somfy, including:

- Exclusive tools for Somfy Experts
- Access online ordering (for direct customers)
- Registration for training programs

The exclusive SomfyPro web shop enables you to order online from Somfy, 24 hours a day, even on weekends. It also lets you:

- Make a "Favorite" list for future ordering
- View your recent purchase history
- Compare products quickly and easily
- Upload large orders using a CSV file

Somfy Expert Dealer Program

The Somfy Expert program is an exclusive network of dealers who have made a commitment to their expertise in offering Somfy-powered solutions for their clients. As a certified Somfy Expert, you will have everything you need to improve customer satisfaction and grow your business to new heights. Enjoy free access to qualified consumer leads, effective sales tools, marketing support, quality training, and personalized service and support.

"We went from selling motorization only when customers asked about it to making it the centerpiece of our in-home consultations.

The results have been huge."

GLAMOUR DECORATING
Somfy Expert since 2015

Qualified Leads

Somfy's website, social media channels, organic search results, and consumer marketing campaigns generate high-quality leads every day. As a Somfy Expert, you can tap into these leads and connect with customers in your area who are interested in motorized window treatments.

Customers Find You

Somfy Experts are featured on our consumer site's Where to Buy dealer locator, the starting place for thousands of customers looking for motorized window treatments each month.

Professional Online Presence

Every Somfy Expert gets a customized profile page on SomfySystems.com, where you can share information about your company, your hours, project photos and videos, and more. Put your best foot forward!

Powerful Sales Tools

As a Somfy Expert, you will gain access to sales tools that help clients experience the convenience and elegance of Somfy. The immersive, interactive Somfy Showroom app makes it easy to demonstrate Somfy motorization using a tablet or laptop.

Concierge Service

Somfy Experts enjoy direct access to an account advisor for fast answers, expedited service, and ongoing support. You can also purchase controls, accessories, and parts directly from your Somfy account advisor, and take advantage of exclusive promotional offers.

Digital Marketing Support

Get the most from your digital and social marketing efforts with customized Somfy assets, including social post graphics, email content and templates, and a customized "benefits of motorization" landing page for your business website.

Training & eLearning

Learn and understand the various motorization and control systems available from Somfy with our exclusive online training resources through SomfyU. Visit www.somfypro.com/services-support/training, where your sales and support teams can stay up to speed as well. You can learn right from your computer, any hour of the day, from virtually anywhere.

BECOME A SOMFY EXPERT Simply go to www.somfypro.com/expert-program and register your company's information. Or, call your Somfy representative to find out how to qualify.

Comprehensive Somfy Support

Somfy offers a wealth of support resources, such as our exclusive SomfyPro website, to assist you with your project. From product documentation and spec sheets, to marketing support materials, project services consultations, and customized quotes, we are here to help.

Project Services Support

Ensuring a positive experience with Somfy-powered solutions is our goal. To help you succeed, our Project Services team provides support from the initial design phase to project completion.

Technical Support

Somfy provides a hotline with real-time consultation and support for your technical questions and challenges.

U.S. Tech Support

TechnicalSupport_us@somfy.com

Canada Tech Support

sctd@somfy.com

Training Support

Partner with Somfy Systems and learn the fundamentals of design, specification, and installation of Somfy's intelligent motor and control solutions. Training programs provide attendees with a competitive advantage and enable leadership in the automated shading industry.

Includes training on the following technologies:

- Zigbee (including TaHoma switch)
- Radio Technology Somfy® (RTS)
- Wired Technology
- Somfy Digital Network™ (SDN)

Visit [SomfyU](#) for more information.

For details on each of these course offerings, including training session dates and registration information, please visit www.somfypro.com/services-support/training.

Point-of-Sale Materials (POS)

To promote Somfy in your showroom, Somfy has various POS materials for interior and exterior solutions to support your sales team:

- Brochures and product sheets
- Displays
- Signage
- Somfy Expert sign (exclusively for Experts)
- Flags

A national digital marketing campaign increases recognition of the Somfy brand, and your presence as a local Somfy dealer will help you stimulate sales in your area. To find out more, please visit www.somfypro.com/expert-program or contact your local Somfy account manager.

New Product Highlights

Take a massive leap forward comfortably

Introducing our new comfort-driven ecosystem, built for everyone. An ecosystem of smart shading products designed to simplify your customers' lives.

Some would say our business is motorization and automation. We would say it's comfort. Ever since we pioneered the industry over 50 years ago, the goal was to give people added convenience in their lives. But to be truly comfort-driven, we must extend this mission even further.

COMFORT is quality and ease in production, so the manufacturers that you buy from can build high-quality window coverings faster and to your exact specifications.

COMFORT is confidence that every installation you do can be done in less time, and will be done right the first time.

COMFORT is the peace of mind you give to homeowners that their smart shades, blinds, and draperies will work seamlessly with any future change in smart home tech.

With Somfy Smart Shading now on Zigbee® 3.0, comfort is the name of the game — from manufacturer to installer to end user. Somfy means comfort.

Smart Solutions by Somfy	37

Smart Home Trends

Smart home technology allows various home systems to work in a more intelligent and interconnected way, from security monitoring and appliances to lighting and entertainment. What once seemed like futuristic science-fiction is rapidly becoming today's standard of operational convenience and end-user simplicity. According to a recent survey by the Consumer Technology Association (CTA),* nearly 70% of U.S. households own some form of smart home technology. Industry research reveals other emerging trends in consumer ownership, purchase intent, and motivation regarding smart home technologies and products.

A Large and Rapidly Growing Market

The United States leads all markets worldwide in terms of smart home penetration with an estimated 32.4% of total households in 2020, representing 41.3 million homes. The U.S. penetration rate is expected to exceed 50% by the year 2024 (sources: Ambient and Statista).

ESTIMATED U.S. SMART HOME PENETRATION RATE

Sales of smart home products in the U.S. were estimated at over \$23.3 billion in 2020 and are expected to double that amount in 2025 (source: Statista). Leading the way in the anticipated growth of the smart home market are the key segments of "Control & Connectivity" and "Comfort & Lighting," both of which are integral to the Somfy product lineup.

ESTIMATED SALES GROWTH OF U.S. SMART HOME PRODUCTS

* Source: <https://www.cta.tech/Resources/i3-Magazine/i3-Issues/2020/January-February/The-Ringing-Future-of-Smart-Home-Technology>

Smart Controls and Smart Speakers

One of the strongest trends currently driving growth in the smart home category is the move toward simplified control of integrated home systems through apps for smart phones and tablets, and through voice-activated control of virtual digital assistant platforms like Amazon Alexa or Google Assistant built into smart speaker devices. Somfy is on the leading edge of this trend with RTS-powered products that integrate easily with today's smart control systems like the innovative TaHoma® smart home hub.

System Standardization

Manufacturers of smart home products have recognized the need for unified standardization and integration, allowing different systems to work together with simple user control and automatic operation. Somfy has partnered with many of the leading consumer and professional brands to ensure that our motorized products are compatible with most third-party systems.

Natural Light Control

The recent trend toward work-from-home and school-at-home lifestyles has dramatically increased the number of hours many North American families spend inside their homes, and has sharpened the focus on wellness and comfort in the home environment. According to a 2020 study conducted by CE Pro, home systems integrators expect to nearly double their deployment of wellness-related technology within the year — and motorized shading with automatic timer control was named the single most popular wellness technology that dealers expect to deploy. Somfy smart shading systems optimize natural light, control glare, and provide a clear view of the outdoors during daylight hours.

What It All Means for You

There has never been a better time to offer Somfy motorized products as an essential element of any smart home upgrade. Consumers are becoming more and more acclimated to smart home technologies in home entertainment, home environment, and home security systems. As price trends in the market continue to make smart home solutions more attractive, and the industry is rapidly standardizing communication and control technologies, customers are now ready to embrace more opportunities to upgrade to smart systems throughout the home — and that includes window coverings.

Benefits of Smart Shading

Somfy's smart shading systems are designed to make life easier and more convenient for homeowners, enhance privacy and home security, improve overall home efficiency, and increase energy savings.

Convenience

Smart home systems allow users to operate multiple devices from multiple manufacturers at once, using a single control unit or smart app to control them all. Total automation is right at the user's fingertips. Smart programming automatically triggers various actions throughout the home based on time of day, current weather conditions, or even through a simple voice command.

Peace of Mind

With smart home technology, roller shades or curtains can open and close at pre-programmed times, and selected lights can turn on and off. These actions help create the impression that someone is at home to deter potential burglars and intruders even when the user is far away.

Privacy

There are times in everyone's life when privacy is crucial. Smart home technology provides users with one-touch simplicity to activate shades, blinds, drapes, shutters, and more... to keep private moments away from unwanted eyes.

Energy Efficiency

Homeowners can enjoy energy savings throughout the year with Somfy smart shading. Outside, awnings and rolling shutters help keep the heat out in summer and let in the sunshine in winter to help warm the home. Inside, blinds and shades can open and close throughout the day to provide optimal natural light and warmth, which will ultimately reduce lighting and heating/cooling costs.

Accessibility

Smart home technology makes it easier for end users with mobility issues to operate window coverings, lighting, entertainment, and other systems without the need to engage with those components directly. Shading systems linked to smart homes make it easy for people with limited mobility to operate blinds, shades, and other window coverings remotely with just a touch, with the natural simplicity of a voice command, or pre-programming them to operate automatically.

Smart Shading by Somfy

Somfy technology enhances and enriches the smart home experience, allowing end users to operate and monitor their connected systems in the home from virtually anywhere in the world. Smart shading by Somfy is smart home technology at its best: manual, voice, or automatic operation of powered devices from anywhere, at any time.

App Control

Somfy is an established leader in smart home technology in the window coverings industry and helped pioneer smart-device app control of shades and blinds by integrating with third-party systems years ago. The introduction of TaHoma in 2021 represents a great step forward, providing users with unified control of up to 40 RTS (Radio Technology Somfy®) channels with up to 40 schedules, and as many as 40 programmed scenes at a time — all with one simple app. Whether at home or away, users can control any motorized interior window covering or exterior pergola, screen, awning, or rolling shutter in the home with just a simple command.

Zigbee®: The Smart Choice Today and Tomorrow

TaHoma also supports Zigbee 3.0 technology, an open global standard for smart home communication and connectivity. Somfy has chosen the Zigbee protocol for our new smart shading product range for a number of smart reasons:

- An open, forward-looking protocol offers greater flexibility and ensures that certified products are compatible with one another in the future.
- It allows bi-directional communication, so not only can the end user send commands from anywhere — they can also receive real-time feedback on equipment status and battery level to always know how their motorized product is positioned.
- Zigbee technology is reliable and can recover a network, extend radio range, avoid interference from other devices during installation and operation, optimize battery life, and offer a high level of security for the end user.
- Zigbee 3.0 creates its own smart ecosystem, enabling Somfy products to easily communicate with each other and allowing control from a single source.

Somfy is a Connectivity Standards Alliance board member, proud to be part of an industrial community recognized as the world leader for interoperable smart products. All Zigbee 3.0 products are cross-compatible and easily work together, including smart lighting, smart shades, security systems, and HVAC systems.

Smart Indoor Living

Somfy's smart shading solutions are an integral part of living a more comfortable and in-control life, today and in the future. RTS motorized solutions, controlled by a smart phone or tablet app or even by voice commands, provide instant activation of window coverings to suit the user's needs at any time. A more enjoyable indoor environment, enhanced privacy, greater energy efficiency, and UV protection are merely a simple gesture away.

All Somfy RTS solutions are designed for maximum operational compatibility. The TaHoma app provides easy integration with most third-party control systems. TaHoma works directly with Amazon Alexa and Google Assistant.

Somfy-powered smart solutions also enhance peace of mind even if the user is on a trip thousands of miles from home. One simple tap on their smart device can operate blinds, shades, curtains, screens, and rolling shutters to provide greater home security and energy savings. And with Zigbee-enabled solutions, end users can receive real-time confirmation that their requested action has been successfully completed. Homeowners will enjoy the comfort of technology that simply works.

Smart Outdoor Living

Throughout the United States and Canada, many homeowners are rediscovering the joys of outdoor living and entertaining. Consumers are spending more of their time outside the home on decks, patios, porches, and in pergolas and other outdoor areas. Somfy smart home solutions include options that help make outdoor life more comfortable, enjoyable, and relaxing.

Somfy offers motorized solutions for awnings, screens, and pergolas to help shade users from the elements when needed, or to retract when the conditions are perfect. Rolling shutters are also available, providing excellent shading, privacy, storm protection, and insulating properties. And just like their indoor window-covering cousins, all Somfy exterior RTS solutions can be set to operate by time of day or by light and temperature sensors.

Somfy is a proud member of the Connectivity Standards Alliance, an organization devoted to developing, certifying, and promoting IoT (Internet of Things) technology standards, including Zigbee.

Somfy Smart Home Integrations

Somfy's motorization products are designed and built to work and play well with others. We have partnered with many of the leading names in smart home technology and integration, including consumer platforms and brands as well as third-party professional brands. And as members of the Connectivity Standards Alliance board, Somfy is well-positioned to remain at the forefront of emerging smart home technologies for years to come.

Somfy's smart home partnerships will continue to expand and offer ever-greater levels of interconnected experience and efficiency for manufacturers, dealers, installers, and end users alike.

Smart Speakers and Voice Commands

Somfy motorized products make it easy to integrate seamlessly with smart speakers and digital assistants with voice-recognition capability through the TaHoma app. This means end users can activate shades, blinds, screens, and awnings individually or in combination with other household systems like lights, thermostats, and more — all with just a few words.

EXAMPLE: SIMPLE COMMAND WITH GOOGLE ASSISTANT

Simply say “Hey Google” to wake up the assistant, then “lower my bedroom shades” to create instant privacy. It is that easy.

Hey, Google...

...lower my bedroom shades

*Apple Home compatibility is only supported for TaHoma switch used with select Zigbee technology motors. See motor specifications for details.

Smart Solutions by Somfy

For professional window-covering dealers and installers, Somfy offers smart shading solutions with extremely simple and seamless installation and setup, plus nearly effortless operation and intuitive control for the end user.

Smart Technology

TaHoma switch is a smart hub that connects Somfy RTS and Zigbee products inside and outside the home to a smartphone, tablet, or computer for remote monitoring and control from anywhere, anytime. It places unified control at the user's fingertips with an intuitive app for easy and immediate control of natural and artificial light in the home environment. And it integrates easily with other smart devices, control systems, and platforms for flexible management of multiple home functions.

Somfy's TaHoma-enabled systems provide everything you and your customers desire in a smart home solution:

- They are easy to install, easy to use, and easy to control.
- Wireless technology can be used in any home with an internet connection.
- Expandable solutions enable integrated control of more than just window coverings.
- Zigbee-compatible devices allow bi-directional communication, giving the user instant feedback of operating status.
- The Somfy "So Open" strategy ensures connectivity with multiple partner brands, now and in the future, through the power and flexibility of open-source development.

The TaHoma app allows end users to create scenes that operate multiple functions with a single click. For example: set a "Wake Up" scene that opens the roller shades, switches on selected lights, and plays a favorite music playlist all at the same time. Users can also program a schedule that opens or closes blinds at certain times of the day, or that automatically operates awnings and shades when certain temperature and weather conditions are detected.

TaHoma pro app

Hassle-free manufacturing and installation for smart shading.
This is truly motion that will amaze.

As easy as 1, 2, 3 to manufacture

1. SCAN the QR code on the motor to establish a direct connection.

2. SET the upper and lower limits, rotation direction, and rotation speed*.

3. NAME the motor, check the battery level*, and set it to delivery mode.

Streamlined for dealers

SCAN a QR code for a direct connection to change individual blind settings in a snap.

REGISTER and set up the TaHoma switch with or without an internet connection.

ADD devices that include shades, remotes, and smart plugs.

CREATE SCENES and schedules to suit your clients' needs.

ServiceGo simplifies after-sales service on your PC

An all-in-one remote monitoring and troubleshooting tool for the Somfy Zigbee ecosystem. Dealers can keep track of all connected installations, diagnose issues, and provide remote service to clients easier than ever! No need for in-person service requests that can cost valuable time.

Mobile screens are for illustrative purposes only.

Control

GIVE CUSTOMERS COMPLETE CONTROL WITH THE TAHOMA APP

The TaHoma app has been designed for homeowners with a new simple and modern interface, intuitive controls, and added functionality.

- Create customized scenes and schedules to set the mood with a touch of a button or a timed schedule.
- Control individual or groups of shades at home or remotely.
- Easily connect and control multiple smart home devices like lights.

Connected, adaptive, and secure

Simple connectivity for seamless installation

Somfy motors also feature Bluetooth, allowing for a direct connection with or without WiFi for programming installations.

End-to-end reliability for your bottom line

From installation to integrating more hardware down the line, Somfy keeps you moving smoothly with the most forward-looking tech to stay open to new smart home innovations.

Bi-directional communication for user comfort

Help your customers feel in control of their space with real-time status of all their window coverings and precise controls for their preferred position.

A Smart Opportunity for You

Consumer demand for smart home solutions has increased significantly over the past four years, and smart home systems are now present in over 32% of North American households (Berg Insight, 2019).

There has never been a better time to offer smart shading solutions by Somfy to meet customer needs with innovative, efficient and reliable products that fit seamlessly into today's smart home designs.

- Versatile range of motors available for a wide variety of shade and curtain options
- Enhanced outdoor living options with motorized awnings, screens, and pergolas
- Sleek, discreet motor design with quiet operation
- Convenient control of home environment, temperature, light, and glare
- Improved efficiency and reduced energy consumption
- Easy installation and integration with existing smart home systems
- Remote access and monitoring via intuitive app from anywhere, anytime
- No hanging cords — a safer solution for children and pets
- Peace of mind — solutions backed by more than 50 years of Somfy innovation and leadership in the industry

As smart home technologies evolve and expand, Somfy will continue to offer advanced, intuitive solutions to specific smart home integration opportunities and challenges as they emerge. Today and tomorrow, Somfy is smart home-ready.

Intelligent Buildings

Somfy® offers intelligent, integrated solutions designed to save costs and enhance productivity in commercial workspaces by optimizing natural light, maximizing energy efficiency, and improving end-user comfort throughout the year in all climates.

Better Building Performance: Inside and Out	44
Intelligent Building Partners	48
Intelligent Control Solutions	50

Better Building Performance: Inside and Out

Somfy provides designers, builders, and building management professionals with flexible exterior and interior shading solutions that adjust to seasonal elements and easily integrate with a building's lighting, heating, and ventilation systems. Somfy's natural light control automation systems are scalable in design, offered in low voltage, line voltage, or wirefree options, and are perfect for projects of any size or budget.

Increased Well-Being and Comfort

Automated shading systems contribute to meeting two important objectives: maintaining comfortable indoor temperatures for a longer period of time and enabling continuous glare control. The amount of natural light that people have access to is a major influence on temperature regulation, and therefore thermal comfort. Natural light also provides visual comfort, which is essential when performing certain tasks and activities. Automated and intelligently controlled solar shading optimizes natural light, preserving the full spectrum of daylight and diffused light as required.

Energy Savings Meet LEED Requirements

Somfy's innovative, automated solar shading solutions create optimal conditions for greater efficiency. This enables building owners to earn credits toward LEED certification on new construction and renovation projects.

Natural Light Management

Artificial lighting systems account for a significant portion of a building's total electricity consumption and energy costs. Automatic window coverings help reduce this cost by allowing ideal levels of natural light into the inside environment while controlling glare and providing a clear view of the outdoors during daytime hours.

Greater Energy Efficiency

Controlling energy costs in commercial buildings has never been more important. Somfy Intelligent Building solutions promote the use of natural light to help manage indoor comfort through the use of automated solar shading. Integrating these systems with artificial lighting controls increases energy savings by dimming artificial light during the day. Further energy savings can be realized due to lower solar gain in cooling months, which reduces demand on HVAC systems.

Add Value to Building Investment

In addition to enhancing occupant comfort, ongoing reduction of energy costs can help offset the cost of the initial investment for integrated automated shading. Automated shading systems also reduce the handling (and possible mishandling) of shading devices by the building's occupants, extending the life of the shading devices and lowering maintenance costs. Automatic shade devices can also boost security by blocking the view of contents inside when the building is unoccupied, reducing the risk of theft and vandalism.

Scalable Solutions

From single or multiple rooms or floors to an entire building, Somfy's animeo® IP installations are suitable for a wide variety of applications. They provide the flexibility to expand and meet the needs of projects of all sizes and types.

SINGLE ROOM OR SINGLE FLOOR

Automate up to hundreds of motorized shades at a time based on outdoor conditions, or programmed for time-scheduled events, utilizing Somfy Digital Network™ (SDN) technology or Somfy animeo IB+.

MULTIPLE FLOORS OR WHOLE BUILDING

For larger installations, Somfy animeo IP system components easily expand system capacity.

40%

Buildings are responsible for 40% of global energy consumption and 33% of greenhouse gas emissions.¹

38%

HVAC accounts for 38% of a building's energy consumption.²

30%

Well-designed control systems can increase building efficiency up to 30% without the need to upgrade existing appliances.³

35%

In test cases, applying automated shading, daylight harvesting, LED lighting, and advanced lighting controls resulted in lighting energy savings between 35% and 42%.⁴

Intelligent Building Partners

Somfy is proud of our robust network of integration partners, collaborating to develop expanded automation solutions for our commercial building customers, today and in the future.

Molex

As a leading provider of electronic components and solutions, Molex views innovation as a tool for solving complex customer challenges. Somfy is integrated into the Molex CoreSync EcoSystem Alliance, powering automated shading solutions for commercial spaces via Power-Over-Ethernet (PoE) technology.

Cisco

Cisco is the worldwide technology leader making the Internet work since 1984. Together, Somfy and Cisco power smart projects that improve building performance and occupant comfort. Cisco's people, products, and partnerships help companies in a variety of industries to securely connect and seize tomorrow's digital opportunities today.

Schneider Electric

Schneider Electric is leading the digital transformation of energy management and automation around the globe. Somfy and Schneider Electric are partners in creating a Connectivity Ecosystem for homes, mid-size buildings, and hotels.

Other Vital Partnerships

Our network of partners in intelligent building systems, networked lighting control, and building automation continues to expand every year.

Intelligent Control Solutions

Somfy offers intelligent motorization solutions that are compatible with most buildings' existing control system technologies – including Network/PoE systems, digital technology, and wired building controls. Choose the right solution that suits your needs; Somfy's Commercial Specification Team will work with you and support your project every step of the way.

Flexibility with a Variety of Building Types

Somfy has experience designing dynamic control solutions based on the unique requirements of virtually any building type, including new and retrofit applications. We are passionate about creating solutions that ensure the best possible working and living conditions.

IT Networking/PoE Technology

Power over Ethernet (PoE) distributes network signals and electrical power to transmit communication over standard low-voltage category cabling to various endpoints including shades, draperies, lighting, HVAC controls, and other networked devices in new or existing projects.

Using PoE technology for shading systems provides a host of advantages and capabilities:

- Delivers both data and power over Cat5e/Cat6 Ethernet cable
- Reduces costs by eliminating the need for AC power infrastructure
- Lowers requirements and dependence on certified electricians for installation
- Decreases cabling costs compared to typical line voltage or specialized low-voltage cable
- Facilitates installation in remote locations

Somfy Digital Network (SDN)

The Somfy Digital Network operates as either a stand-alone option or included in animeo IP systems. SDN components are integrated into a system designed to operate a broad range of products, including roller shades, over a standard RS485 network. Bi-directional communication allows status feedback from each motor on the network in real time. SDN utilizes a bus network architecture so you can establish a remote connection to the system from most locations throughout the building.

A stand-alone SDN scalable shading system, without a system-wide master controller, provides powerful yet economical building solutions:

- Manage unique addresses for each intelligent motor.
- Operate AC line voltage motors and DC low voltage motors on a single intelligent network with no gateway devices required.
- Manufacturers can pre-set upper and lower motor limits, adjustable on-site via handheld device.
- Configure and manage controllers, schedules, and motor groupings from any point in the system's wiring network.
- Each motor automatically aligns itself to a referenced shade position upon receiving a command from the network.

Somfy's energy-saving digital control systems provide optimal control of window coverings based on weather input from sensors, pre-programmed settings, or local user control.

Lowered coverings help prevent heat loss on cooler days during nighttime hours.

Lower window coverings during the warmest part of the day to reduce heat gain.

Digital Technology: animeo IP

Somfy's animeo IP portfolio consists of intelligent building controls, motor controls, local controls, and a full array of sensors and accessories. This complete range of proven solutions ensures maximum functionality and flexibility, as well as a simple installation process. Moreover, our products are naturally compatible with each other to ensure interoperability. Our intelligent solutions to automatically control solar shading will enhance occupants' comfort and well-being while improving the building's energy efficiency:

- Advanced scheduling with the timed-events feature ensures the building is running as efficiently as possible during periods of high occupancy or low occupancy.
- The right balance of wall-mounted keypads, wireless controls, and virtual keypads provides occupants with versatile control over nearby window coverings.
- Sun tracking automates natural light management based on the sun's position and façade direction to minimize glare and maximize effective daylight.
- animeo IP/RS485 technology provides bi-directional status reporting of window covering positions, allowing easy, at-a-glance system status snapshots.
- Intuitive user interface allows simplified commissioning, building management, and technical support with drag-and-drop zone creation and motor discovery.
- Solar Entrance Depth Management adjusts shade height through the day to protect furnishings, maximize daylight, and minimize glare.

Digital Technology: Touch Building Controller

The animeo IB+ Touch Building Controller (Touch Buco™) provides simple, intuitive touch-screen control over a building's shading systems. It is designed for easy, reliable use in small-to-medium commercial buildings, providing a flexible solution that is ideal for single-tenant or multi-tenant offices.

- Up to eight individually configurable zones allowing control of blinds, screens, rolling shutters, and more
- Suitable for use with a variety of interior and exterior window coverings
- Four selectable control modes — from fully automated to occupant control
- Sun tracking control, for optimal visual comfort and energy-saving performance throughout the day
- Retrieval and display of up to three months of data (events, settings, sensors, etc.)
- Compatibility with all animeo IB+ motor controllers and two-wire IB+ bus technology
- Easy, unique allocation of motors and façades with fast software upgrades
- Ready to fit and ready to work: less cabling, quick handling, and equipment that adapts to a changing environment

MOTOR CONTROLLER
WIRED OR RADIO TECHNOLOGY

MOTORS

USER CONTROLS

Wired Technology (WT) Building Control Systems

Standard wired technology controls offer a time-tested and cost-effective solution for many building applications. In new construction or renovations, WT solutions provide simple and reliable control for installations that require less sophisticated management solutions.

A variety of individual control options utilizing DCT or wired switches are available. The common motor options available for wired technology are durable, dependable, and feature a wide variety of torques and speeds for interior or exterior motorized shading applications.

The Somfy Individual Group Control (IGC) 4n1 Motor Controller is a scalable wired device allowing individual and group control for up to four Somfy® Wired Technology (WT) motors.

- Up to three intermediate positions per motor, preset at 25%, 50%, and 75% openness
- Custom intermediate positions set by user with a DecoFlex Dry Contact Keypad (1811402)
- Synchronized control, from a single keypad, of multiple IGC 4n1 Motor Controllers daisy-chained together
- Four keypad ports and two master ports

Power & Network Technologies

Somfy's power supply and networking equipment keeps your projects on the leading edge of innovative technology and cost-saving efficiency. Somfy® continues to improve and evolve with the constant development of new products and technologies to meet the demands of a changing market.

Somfy Digital Network Components	61
Power Over Ethernet (PoE)	66

Somfy Digital Network Components

The Somfy Digital Network (SDN) is the latest generation of busline-enabled intelligent components, integrated into a cost-effective, scalable system to operate blinds, shades, solar screens, projection screens, and other end products over a standard network.

Bi-directional communication provides feedback from each motor on the network, allowing the system to view the position and status of any motor in real time. The SDN network runs over standard network architecture, allowing users to connect to the system from anywhere with internet access.

Data Hub

The Data Hub is a Somfy Digital Network (SDN) bus distribution component which adds five device ports to an SDN bus line. The device ports support wire stubs with a maximum length of 200 feet.

Data Panel

Somfy Data Panel is a bus distribution component used to start or grow a Somfy Digital Network (SDN) system. This device adds four isolated bus segments to an SDN system. Each isolated bus segment output supports up to 255 devices, a maximum of 4,000 ft. of bus wiring per segment, and supplies as many as 100 power units. The in-wall or on-wall mountable enclosure offers separated line and low voltage areas for ease of installation.

SDN Keypads

DecoFlex™ Digital Keypads for the Somfy Digital Network (SDN) are intelligent, intuitive control devices that provide a hard-wired, in-wall user interface for stand-alone SDN shading systems. Keypads provide users with a familiar way to adjust their environment for personal comfort. Commission SDN keypads using Set pro by Somfy software for higher productivity and streamlined operations even before setting foot on-site.

Somfy animeo® IP Components

Somfy's animeo IP is an automation system for natural light management utilizing Somfy intelligent motorized window coverings, as well as digital keypads and weather sensors. The system's controllers, sensors, and keypads provide automation to new and existing SDN installations, enabling comprehensive solar management as either a stand-alone solution or with third-party control systems. Its intuitive user interface allows for simplified commissioning, building management, and technical support featuring drag-and-drop programming, motor auto discovery, and at-a-glance real-time system status updates.

Somfy animeo® Keypads

Somfy DecoFlex Keypads provide a simple in-wall user interface for animeo IP systems. The keypad offers users a familiar way to adjust their environment for personal comfort without affecting the overall efficiency of the building.

An intuitive setup that guides you effortlessly through the configuration of Somfy Digital Network™ (SDN) motorized shades, keypads, and the RTS receiver.

BUILDING CONTROLLER The animeo IP Building Controller features a sophisticated graphical user interface and built-in software applications for managing scheduled events, sun tracking, and virtual web-based keypads. An animeo IP Building Controller is required for every animeo IP installation. For larger animeo IP systems (over 200 motors), animeo IP Sub Controllers must be used.

SUB CONTROLLER The animeo IP Sub Controller expands the system's capacity beyond the initial 200 motors supported by the animeo IP Building Controller. Each additional Sub Controller supports 200 motors.

SENSOR SYSTEMS Somfy animeo IP sensors deliver data on current conditions to the Building Controller in real time, including temperature, light intensity, wind, and weather variables. This allows natural light management systems to react and adjust automatically as conditions change.

Power Over Ethernet (PoE)

Power over Ethernet (PoE) distributes electrical power and communicates data over a single low-voltage cable to shades, draperies, LED lighting, HVAC controls, and other networked devices utilizing the building network as a communications backbone. PoE reduces costs and saves time in new or existing projects by eliminating the need for AC or DC power supplies, and by reducing dependence on electricians or installation.

Sonesse® 40 PoE

The ultra-quiet, more powerful Sonesse 40 PoE allows motorization for shades as large as 13 ft. x 13 ft. Its direct integration to third-party control systems via the Somfy Synergy™ API eliminates the need for additional hardware.

Sonesse® 30 PoE

The Sonesse 30 PoE meets the IEEE 802.3 at standard and is directly powered by any 30W PoE switch that meets this standard. No charging or eventual replacement of batteries required.

PoE Gateway

A key component of Somfy's Power over Ethernet network is the SDN PoE Gateway. The PoE Gateway component can power and control up to four separate motors with a single module and facilitate expansion of PoE technology to power and control shades and draperies — even across longer distances and to hard-to-reach spots.

The PoE Gateway is compatible with the following Somfy motor systems:

- Sonesse® 30 RS485 DC
- Sonesse 50 ULTRA DC RS485
- Irismo™ 35 Mini DC

Interior Applications

For new home applications and retrofit opportunities alike, Somfy® offers smart, simple, easy-to-use natural-light management solutions to suit every project and any end-user need. Each is designed to fit comfortably within virtually any living environment to enhance interior comfort, convenience, and safety year-round.

Smart Technologies	70

Smart Technologies

Somfy-powered shades, blinds, draperies, and screen systems integrate easily with the latest smart home technologies, allowing simple and intuitive control of indoor shading via voice commands or smart device app. Advanced smart control systems, such as TaHoma®, make it easy to program routine actions based on time of day or current light and temperature conditions. Users are able to create scenes that operate multiple functions with one command — such as a “Wake Up” scene that opens roller shades, switches on lights, and plays a music playlist on a smart speaker all at once. They can also program a simple schedule that opens or closes blinds at certain times of the day automatically.

Motorized Blinds, Shades, and Draperies

Now more than ever, people are re-discovering the art of living well at home. Somfy-powered indoor natural-light management products are designed to enhance the lifestyle and enjoyment of the user within their home environment anytime.

CONTROL NATURAL LIGHT Motorized blinds, shades, and draperies allow more than just convenience. Somfy’s custom-made solutions provide the ability to play with light and space within a room to create a mood with one-touch simplicity.

DO NOT DISTURB Our latest lineup of motors for indoor applications are designed for quiet operation when opening and closing. End users can enjoy the silence with fewer distractions.

ENERGY EFFICIENCY Somfy motorized solutions make it easy to reduce energy costs by keeping out the light and heat on the warmest days, and allowing in sunlight and warmth on chilly days.

POWER SOURCE FLEXIBILITY Somfy makes motorized light-management solutions come to life with a choice of power supply options, including the plug-in convenience of AC current, the efficiency of low-voltage DC current, and the flexibility of wirefree™ technology.

RELIABILITY AND PEACE OF MIND Somfy motors are backed by a full five-year warranty.

[illegible]

Shade & Blind Motors

Designed for Silence Sonesse offers whisper-quiet operation for those “do not disturb” moments.

Power Options Wired and wirefree, there's a Somfy motor to fit any project.

Privacy Just a quick touch easily creates a secluded retreat from the outside world.

Smart Home Intelligent control systems for convenient, smart home management.

Energy Efficiency Automated control of natural light enables end-users to realize energy savings in all seasons.

Technologies Innovative technologies provide a range of options to meet the most demanding situations.

Sonesse® 40 AC Motors

Zigbee®

Sonesse 40 Zigbee is an easy, smart, robust & quiet solution to integrate into all types of interior shading.

Easy installation

- Seamless integration to match any interior decor
- Thin round head for smooth transition into shade and tube profile
- Interchangeable head color (white, black, and grey) to match fabric and hardware style or color
- Recessed interchangeable metal adaptor plate compatible with all hardware systems
- Smaller light gap to minimize light leakage
- Fits small diameter tubes (suitable for an internal diameter of 38mm or more)
- Ideal for narrow windows to maximize viewable area
- UL listed to comply with local building codes and requirements

Easy integration

- Easily integrates with third-party control systems when used with TaHoma® switch

Easy programming and adjustment with TaHoma® pro

- Allows for quick and easy configuration of motors and operational settings to simplify the installation process
- Installation and programming done directly from the app: intuitive step-by-stop programming instructions
- Integrated button on the motor head allows for leaving the network and full reset
- LED feedback for easy troubleshooting
- Acts as a Zigbee® mesh network router to extend radio range

Maintenance

- Dedicated maintenance tool, Serv-e- Go

Sustainable

- Eco-designed motor with the Act for Green promise by Somfy that provides a PEP Ecopassport Environmental Product Declaration for LEED V4.1 credit

Reliability and services

- Highly secure protocol
- Somfy quality and warranty

Somfy Digital Network™ (SDN) RS485

This intelligent motor is dedicated to a wide range of interior window coverings and features a powerful lifting capacity within a smaller overall footprint to fit narrow window openings. Its flexibility fits many building types (education, health care, hospitality, offices, retail, transportation, leisure, and residential).

Easy integration

- Seamless integration to match any interior decor
- Thin round head for smooth transition into shade and tube profile
- Interchangeable head color (white, black, and grey) to match fabric, hardware style, and color
- Recessed interchangeable metal adaptor plate compatible with all hardware systems
- Smaller light gap to minimize light leakage
- Fits small diameter tubes (suitable for an internal diameter of 38mm or more)
- Ideal for small narrow windows to maximize viewable window area
- UL listed to comply with local building codes and requirements

Easy installation

- Offers intelligent two-way communication via the industry standard RS485 for compatibility with the Somfy Digital Network™ (SDN)
- Easily integrates with third-party control systems
- Intelligent motors that are controlled and monitored via SDN solutions and the animeo® IP total solar management system

Easy setting

- Programming button on motor head allows for push-button control
- Visual feedback via integrated LED to confirm programming
- LED feedback for easy troubleshooting
- Setup and commissioning via SDN RS485, a 2-way bus line for reliable hard-wired control and integration to third-party and building management systems

Radio Technology Somfy® (RTS)

Motorize a wide variety of window coverings to create the perfect environment, and enjoy the peace and serenity provided by the Sonesse® ULTRA. It offers exceptional lifting capacity so users can enjoy powerful operation in a quiet, relaxing setting.

ULTRA Powerful

- Superior torque of up to 6Nm allows the motor to be installed for almost any application on the market.
- Allows for a single Sonesse ULTRA to multi-band up to six shades.

ULTRA Quiet

- Packed with innovations and patented technologies that provide 6Nm of power and an acoustic performance of less than 38dBA.
- Most powerful and quietest motor on the market.

ULTRA Flexible

- Available for a variety of control systems, for all types of spatial configurations in commercial and residential buildings, and in both new and renovated projects.
- Radio Technology Somfy® (RTS) allows wireless radio control of motorized applications via the RTS family of controls.

Sonesse® ULTRA 50 AC Motors

Somfy Digital Network™ (SDN) RS485

Motorize a wide variety of window coverings to create the perfect environment, and enjoy the peace and serenity provided by the Sonesse® ULTRA. It offers exceptional lifting capacity so users can enjoy powerful operation in a quiet, relaxing setting.

ULTRA Powerful

- Superior torque of up to 6Nm allows the motor to be installed for almost any application on the market.
- Allows for a single Sonesse ULTRA to multi-band up to six shades.

ULTRA Quiet

- Packed with innovations and patented technologies that provide 6Nm of power and an acoustic performance of less than 38dBA.
- Most powerful and quietest motor on the market.

ULTRA Flexible

- Available for a variety of control systems, for all types of spatial configurations in commercial and residential buildings, and in both new and renovated projects.

Two-way Communication

- Offers intelligent two-way communication via the industry standard RS485 for compatibility with the Somfy Digital Network (SDN).
- Easily integrates with third-party control systems.
- Intelligent motors that are controlled and monitored via SDN solutions and the animeo® IP total solar management system.

Radio Technology Somfy® (RTS)

The Sonesse® 50 range puts window coverings in motion with quiet precision. It's an ideal choice for a variety of interior and exterior window covering applications. Radio Technology Somfy® (RTS) allows wireless radio control of motorized applications via the RTS family of controls.

Multiple Applications

- Interior, Exterior, Residential, Commercial, Integrated solutions.

Simple Installation & Setup

- Compatible with leading industry hardware.
- Can be mounted in the bracket six different ways.
- Features a "snap-on" style connection for roller tube adaptors.
- Interchangeable power cords, or a quick connector with extension options, provide multiple power cord lengths to meet installation demands.
- Radio Technology Somfy (RTS) provides wireless commands to eliminate control wiring.
- Limits easily set using a hand-held remote.
- Suitable for tubes diameter 47mm or more (internal diameter)

Wide Compatibility

- Compatible with Somfy's full range of RTS controls and accessories.
- Users can use natural voice and app commands to control motorized products by adding TaHoma.
- Easily integrates with third-party control systems.

Sonesse® 30 PoE Motor

Power over Ethernet (PoE)

The Sonesse® 30 PoE motor provides innovative control of motorized window treatments using Power over Ethernet, lowering costs and improving efficiency.

Easy integration

- Seamless integration to match any interior decor
- Thin round head for a smooth transition into the shade and tube profile
- Smaller light gap to minimize light leakage
- Interchangeable head color (black and grey) to match fabric, hardware style, and color
- Fits smaller diameter tubes (suitable for internal diameters of 31mm or more)
- Ideal for small, narrow windows to maximize viewable window area

Easy installation

- Single Cat-5e or higher ethernet cable carries power and data
- Ethernet network cabling that does not require a qualified electrician
- UL listed
- IEEE 802.3 at Type2 (30W) power requirement
- Low voltage power for safe and easy wiring
- Up to 328 feet from the PoE switch to the motor

Easy setting

- Connect directly to the motor via a web GUI (no physical setting tool required)
- Somfy Synergy™ API inside which allows for direct integration to your favorite third-party control system without the need for additional hardware
- Open solution that works with certified driver partners
- Soft stop and soft start independently adjustable
- Adjustable speed, independently adjustable in each direction

Secure protocol

- Certificate + PIN code to secure TCP/TLS AES-128 encryption over UDP.
- Somfy Synergy™ API
- CoAP
- Manufacturer Usage Description (MUD) file available for secure network configurations

Sonesse® 30 DC Motors

Zigbee®

The Sonesse® 30 24V DC Zigbee motor increases motorized shading opportunities. It features a 2Nm powerful lifting capacity utilizing low-voltage DC power to quietly operate small profile shades and is dedicated to a variety of interior applications.

Convenience

- Compatible with a wide range of interior window coverings

Easy integration

- Seamless integration to match any interior décor
- Thin round head for smooth transition into shade and tube profile
- Smaller light gap to minimize light leakage
- Interchangeable head color (white, black, and grey) to match fabric and hardware style and color
- Recessed interchangeable metal adaptor plate compatible with all hardware systems
- Fits small diameter tubes (suitable for an internal diameter of 31mm or more)
- Ideal for small narrow windows to maximize viewable window area
- Low-voltage 24V DC power for safe and easy wiring

Easy programming and adjustment with TaHoma® pro

- Installation and programming done directly from the app: intuitive step-by-step programming instructions
- Integrated button on the motor head allows for leaving the network and full reset
- Acts as a Zigbee® mesh network router to extend radio range
- Dedicated maintenance tool, Serv-e-Go

Reliability and services

- Safe protocol
- Somfy quality & warranty

Radio Technology Somfy® (RTS)

Quiet small shade motorization that features interchangeable, colored motor head covers designed to blend into any décor. This motor adapts to any hardware to consistently reduce the light gap.

Expand Opportunities for Success

- Improved sound level that meets our Designed for Silence criteria.
- Fully UL listed motor, meets safety & inspection requirements.
- New style motor head with interchangeable head covers available in 3 different colors (white, grey, and black).
- Ideal for small, narrow windows to maximize viewing area.
- Local control via a simple press of a button directly on the motor head.

Easy to Fabricate & Install

- Low-voltage (24V) for safe and easy wiring.
- Ergonomically friendly manual programming button on the motor head allows easy access and provides local control.
- LED lights provide visual feedback to confirm communication.
- Thin motor head minimizes the light gap.
- Recessed, interchangeable metal adaptor plates are compatible with industry-leading hardware and maintain the reduced light gap.
- Allows wireless radio control of motorized applications via the RTS family of controls.

Roll Up Wired R28 DC Motors

Standard Motors – Rapid Limit Adjustment

Users set blinds and shades in motion using low-voltage wiring which does not require an electrician.

Comfort & Convenience

- Conveniently manage glare.
- Protect furnishings from harmful rays.
- No unsightly lift cords which makes it safer for children and pets.

Energy Savings

- Easily control the amount of sunlight entering the home or building.

Easy to Install

- Flexible wiring thanks to an adjustable cable and plug-in connector.
- Limit end stops adjustable individually with two independent switches.

Roll Up 24 WireFree™ (Li-ion) Motor

Radio Technology Somfy® (RTS)

The Roll Up 24 is a compact motor that is ideal for applications requiring minimal spacing, such as narrow window openings. It features a built-in rechargeable Li-ion battery for easy maintenance and cost efficiency.

Main Features

- Discreet, compact design to accommodate today's high-performance energy-efficient windows.
- Slow start and stop produces elegant shade movement.
- Compatible with roller/solar shades, Roman shades, woven shades, sheer horizontals, zebra/layered shades and horizontal blinds.
- Wirefree solution for areas where wiring can be costly.
- Backed by Somfy's 5-year warranty.
- Solar charging option.
- ESD Immunity.

Sonesse® 28 WireFree (Li-ion) Motors

Zigbee®

The Sonesse® 28 WireFree Zigbee (Li-ion) is a designed for silence wirefree motor dedicated to a wide range of interior window coverings. It features a built-in rechargeable lithium-ion battery for easy installation, minimal maintenance and enhanced aesthetics.

Convenience

- Compatible with a wide range of interior window coverings

Easy installation

- No wiring or external batteries

Easy programming and adjustment with TaHoma® pro

- Installation and programming done directly from the app: intuitive step-by-step programming instructions
- Integrated button on the motor head allows for leaving the network and full reset
- Dedicated maintenance tool, Serv-e-Go

Reliability and services

- Highly secure protocol
- Premium, quality battery that can be replaced
- Somfy quality & warranty

Sonesse® 40 WireFree (Li-ion) Motor

Zigbee®

The Sonesse® 40 WireFree Zigbee (Li-ion) increases motorized interior shading opportunities with 4Nm ultra-strong wirefree performance. Featuring a built-in rechargeable lithium-ion battery, this ultra-quiet and ultra-reliable motor eliminates the need for wiring, providing convenience to both installers and end users.

Easy installation

- Seamless integration to match any interior decor
- Thin round head for smooth transition into shade and tube profile
- Interchangeable head color (white, black, and grey) to match fabric and hardware style or color
- Recessed interchangeable metal adaptor plate compatible with all hardware systems
- Smaller light gap to minimize light leakage
- Fits small diameter tubes (suitable for an internal diameter of 38mm or more)
- ETL listed to comply with local building codes and requirements
- USB-C connector allows optimized charging experience

Easy programming and adjustment with TaHoma® pro

- Installation and programming done directly from the app: intuitive step-by-step programming instructions
- Integrated button on the motor head allows for leaving the network and full reset

Radio Technology Somfy® (RTS)

The Tilt WireFree has been specifically designed for tilting 2" horizontal blinds. When combined with the new Situo® 5 Variation RTS remote, users can incrementally adjust slat positioning for precise control of natural lighting.

Main Features

- Improved sound performance.
- Battery-operated.
- Built-in power cable and integrated programming button.
- Through-shaft design simplifies the fabrication process, no modification of tilt rod required.
- Allows for a wider application scope (wood, faux, composite, and metal blinds).
- Increased retrofit possibilities.
- Solar charging options.

Drapery Motors

Designed for Silence Glydea ULTRA, the quietest motor available, transforms any room into a private, hushed environment.

Power Options WireFree, Plug-in (AC or DC), and hard-wired (AC) options available.

Strong Traversing Capacity Powerful enough to easily skim curtains across expansive windows.

Smart Home Smartphone app or voice commands enable effortless and convenient control.

Style Flexibility Premium motorized control for Ripplefold®, Pinch Pleat and many of the most popular drapery styles.

Technologies Advanced technology solutions that are easy to install and simple to use.

Glydea® ULTRA Motors

Radio Technology Somfy® (RTS)

Glydea® ULTRA is reliable, adaptable, robust, and discreet. A premium solution to motorize all types of curtains in any residential or commercial space.

Comfort & Convenience

- Reduce glare or enjoy privacy using the quietest motor solution available.
- Strong traversing capacity offers light, fluid movement for heavier curtains.

Energy Saving

- Reduce energy costs automatically by adding sensors or timers.
- Protect valuable furnishings from the sun's damaging UV rays.

Glydea® ULTRA is reliable, adaptable, robust, and discreet. A premium solution to motorize all types of curtains in any residential or commercial space.

Comfort & Convenience

- Reduce glare or enjoy privacy using the quietest motor solution available.
- Strong traversing capacity offers light, fluid movement for heavier curtains.

Energy Saving

- Reduce energy costs automatically by adding sensors or timers.
- Protect valuable furnishings from the sun’s damaging UV rays.

Main functions

- Large window coverings
- Automatic limit setting
- Manual override
- Quick & easy settings
- Touch Motion

Irismo™ Motors

Radio Technology Somfy® (RTS)

The Irismo™ Mini DC is a friendly, low-voltage, and discreet solution to easily motorize draperies.

Comfort & Convenience

- Perfect solution to reduce glare or create instant privacy.
- Open or close draperies with the simple press of a button.
- Superior, reliable performance.
- Smartphone/tablet app provides control from virtually anywhere.
- Use natural voice commands to control RTS motorized solutions by adding TaHoma.

Energy Savings

- Reduce energy consumption up to 40%.
- Protect valuable furnishings from harmful UV rays.
- Add optional timers or sensors to provide automatic control.

Flexible Control Options

- Built-in RTS module (compatible with all RTS control options).
- Easy integration with third-party automation systems.

Aesthetically Pleasing

- Clean white finish can easily be concealed above, to the left, or to the right of the track.

Quiet Yet Efficient

- Motor design and advanced high performance belt drive system provides quiet operation.
- Touch motion and manual override allows manual control as desired.

Outdoor Living

Today more than ever, people are looking beyond their walls and seeking ways to extend the comforts of their living environment to the great outdoors. For homeowners and commercial operations alike, Somfy® provides a variety of motorization solutions to maximize the comfort and convenience of outdoor life. These solutions are easy to install, easy to operate, and easy to enjoy.

Convenient Control	186
Awning Motors	189

Exterior Screen Motors	215
Exterior Screen Accessories	227
Pergola Motors	239
Pergola Accessories	241
Rolling Shutter Motors	243
Rolling Shutter Accessories	255

Convenient Control

Somfy makes it simple to take pleasure in the outdoors with a choice of control systems for effortless, intuitive operation.

- Radio Technology Somfy® (RTS) systems place total control of awnings, screens, rolling shutters, and pergolas at the user's fingertips with hand-held remotes, wireless switches, automatic timers, and other control options.
- Somfy's TaHoma® provides easy control anytime with a simple smart-device app, automatic timed scenes, or even natural voice commands.
- Somfy sensor accessories allow the ultimate in convenience with automatic control depending on time, wind, sun, or weather conditions.

Awnings

Motorized awnings powered by Somfy instantly transform any deck, patio, or porch into a cool, shaded outdoor living space with one-touch simplicity. They give users more opportunity to enjoy their outdoor living space and more control of their natural outdoor lighting, while protecting their valuable furnishings from harmful UV rays.

Somfy sensors enable awning systems to detect and react to changing outdoor conditions. When the sun beats down, the awning extends; when the wind begins to blow, it automatically retracts.

Exterior Screens

Motorized exterior screens are a simple solution that enhances the cool comfort, insect protection, energy efficiency, and privacy of virtually any living environment. Our motorized systems are designed for all types of outdoor screens.

When integrated with an RTS sun sensor, Somfy exterior screen systems will lower automatically to maintain an optimal temperature inside. And when night falls and lights turn on, a timer enables screens to lower and protect the home from unwanted insects.

Pergolas

Utilizing built-in sensors, Somfy's motorized pergola systems automatically adapt the position of the slats according to the weather conditions. In rain, snow, strong winds, ice, or other challenging conditions, the pergola remains protected year-round.

Customized pergola systems allow easy outdoor comfort and enjoyment in all four seasons, especially when connected with heating and lighting products.

Rolling Shutters

Motorized rolling shutters protect any home from the elements, including hurricanes and storm damage, with the touch of a button or a simple voice command. Users can also control them when away from home with our TaHoma smart system.

Somfy rolling shutter motors offer enhanced security and resistance to break-ins thanks to their tough anti-lift links. They also provide excellent insulation for energy savings, and for shutting out noise and light from the outside. And Somfy offers the quietest rolling shutter motors in the industry for a peaceful home environment.

Awning Motors

Extend Outdoor Living Space Quick, cool comfort for patios and decks, and UV protection for valuable outdoor furniture.

Power Options A wide range of torque choices available. Sunea motors are UL listed for safe, easy-to-use connection.

Features for Flexibility Motors equipped with compact manual override in event of a power failure.

Smart Home Limit settings and product position preferences managed with fingertip controls or TaHoma switch.

Energy Savings In addition to controlling natural light, environmentally friendly motors conserve power in standby mode.

Technologies Adapts to quickly changing weather with sensors that react to sun, wind and rain.

LS40 AC Motor

Standard Motors - Progressive Limit Adjustment

The LS40 AC is a wired, 40mm motor for blinds and screens.

Easy Integration

- Thin and round head.
- Suitable for compact tubes diameter 37mm or more (internal diameter).

Easy Limit Setting

- Down and up end limits set by the progressive adjusting knob on the motor head.

Simple, Effortless, and Comfortable

- Accessible motorization to move blinds, shades, or screens effortlessly.

LT50 Sunea® CMO AC Motors

Radio Technology Somfy® (RTS)

Sunea™ is the most advanced, innovative motor for cassette, semi-cassette, and standard awnings. A Sunea motorized awning can be controlled with any Radio Technology Somfy accessory including hand-held remote controls, wireless wall switches, and timers.

Easy Install

- Can be plugged into a standard wall outlet or hard-wired.
- Automatically resets its limits as the fabric settles or stretches.
- Maintain control of the awning even with loss of power using a manual crank handle.
- Settings and controls are maintained in the motor's memory.

Radio Technology Somfy

- Compatible with all RTS-powered systems, controls, and accessories so users can mix and match options to maximize product performance.
- Exclusive Somfy "my" feature saves a favorite/preferred product position.
- RTS is omni-directional, so no need to aim the remote at the product being controlled.

Universal Quick Connector

- Molded in white to match connector and cable colors.
- For interior and exterior IP55 (diameter 40 & 50) motors, radio and wired.
- UL recognized for a safe, easy-to-use connection.
- Plug & play extensions (no electrician needed).
- Limited motor SKUs to effectively manage inventory.
- Flexibility to manage extension lengths as needed.

LT50 Orea® AC Motors

Radio Technology Somfy® (RTS)

Orea® is suitable for pre- and post-construction opportunities and can be controlled with any Radio Technology Somfy accessory including hand-held remote controls, sensors, wireless wall switches, and timers.

Easy Install

- Plug and play tubular motor with no need for costly wiring.
- Star motor head reduces the light gap.
- Automatic up limit detection with adjustable closing force to ensure a cassette always closes perfectly.
- Easily set and adjust limits with the transmitter.

Radio Technology Somfy

- Compatible with all RTS-powered systems, controls, and accessories so users can mix and match options to maximize product performance.

LT50 AC Motors

Standard Motors – Rapid Limit Adjustment

The LT50 AC is a standard 4-wire star head motor, an ideal choice for pre-construction opportunities while the walls are open. Control an individual shade or group of shades with a wired switch.

Installation Advantages

- Adjustable motorhead orientation installs in 6 different positions.
- Power cable is detachable at the motor head for quick replacement when necessary or to manage wire length.
- Drive wheels snap on for quick assembly.
- Rapid push-button limits allow for quick and easy setting and adjustment.
- Optional fast connectors are available in various lengths to avoid the need for an electrician.

Energy Savings

- Act for Green motor, designed to be environmentally friendly.
- Doesn't consume power in standby mode for reduced user costs.

LT60 Altus® AC Motors

Radio Technology Somfy® (RTS)

The LT60 Altus is a universal solution for larger rolling shutters and awnings.

Easy Install

- Can be plugged into a standard wall outlet or in-wall wired.
- Limits quickly set and adjusted from the transmitter.
- Starhead motor reduces the light gap.

Radio Technology Somfy

- Compatible with all RTS-powered systems, controls, and accessories so users can mix and match options to maximize product performance.
- Exclusive Somfy “my” feature saves a favorite/preferred product position.
- RTS is omni-directional, so no need to aim the remote at the product being controlled.

LT60 CMO AC Motors

Wired

LT60 CMO standard tubular motors are ideal for larger applications. They feature a compact manual override for when power is not available.

Ease of Installation

- Standard 4-wire motor is an ideal choice for preconstruction opportunities while the walls are open and operation with a wired switch is preferred.
- Standard control options include wired wall switches.
- Easily set and adjust limits using rapid push-buttons.
- Detachable power cable to easily manage wire length, or replace if needed.

Environmentally Friendly

- Designed to save energy.
- Doesn't consume power in standby mode.

Exterior Screen Motors

Simple & Effective Enjoy the breeze and keep insects out for a more pleasant outdoor experience.

A Bit of Privacy A touch or voice command quickly adds extra privacy for backyard spaces.

Power Options Systems available for all types of outdoor screens.

Smart Home Compatible with RTS and TaHoma switch for easy control.

Technologies Obstacle detection protects the screen as well as furnishings and other items.

LS40 AC Motor

Standard Motors - Progressive Limit Adjustment

The LS40 AC is a wired, 40mm motor for blinds and screens.

Easy Integration

- Thin and round head.
- Suitable for compact tubes diameter 37mm or more (internal diameter).

Easy Limit Setting

- Down and up end limits set by the progressive adjusting knob on the motor head.

Simple, Effortless, and Comfortable

- Accessible motorization to move blinds, shades, or screens effortlessly.

Main functions

LS40 Altus® AC Motors

Radio Technology Somfy® (RTS)

The LS40 Altus is a universal solution for exterior & interior applications.

Wide Range of Solutions

- Compact 40mm design adapts easily to smaller shading hardware, requiring less mounting space.
- Compatible with Somfy's full range of RTS controls and accessories.

Universal Quick Connector

- Molded in white to match connector and cable colors.
- For interior and exterior IP55 (diameter 40 & 50) motors, radio and wired.
- UL recognized for a safe, easy-to-use connection.
- Plug & play extensions (no electrician needed).
- Limited motor SKUs to effectively manage inventory.
- Flexibility to manage extension lengths as needed.

LT50 Orea® AC Motors

Radio Technology Somfy® (RTS)

Orea® is suitable for pre- and post-construction opportunities and can be controlled with any Radio Technology Somfy accessory including hand-held remote controls, sensors, wireless wall switches, and timers.

Easy Install

- Plug and play tubular motor with no need for costly wiring.
- Star motor head reduces the light gap.
- Automatic up limit detection with adjustable closing force to ensure a cassette always closes perfectly.
- Easily set and adjust limits with the transmitter.

Radio Technology Somfy

- Compatible with all RTS-powered systems, controls, and accessories so users can mix and match options to maximize product performance.
- Exclusive Somfy "my" feature saves a favorite/preferred product position.
- RTS is omni-directional, so no need to aim the remote at the product being controlled.

LT50 Maestria™ AC Motors

Radio Technology Somfy® (RTS)

The Maestria™ 50 RTS is designed to motorize all types of exterior vertical screens while offering the specific functionalities needed for zip applications.

Intelligent

- Smart functions such as obstacle detection and automatic adjustment protect screen and patio furniture.
- Automatically adjusts to stretch the fabric.

Easy to Install

- Plug & play and precise setting features make installation quick, easy, and streamlined.

Reliable

- Obstacle detection protects the fabric, as well as the outdoor furniture.

Flexible

- Maestria is compatible with all types of screens and RTS control options.

Sonesse® 50 AC Motors

Radio Technology Somfy® (RTS)

The Sonesse® 50 range puts window coverings in motion with quiet precision. It's an ideal choice for a variety of interior and exterior window covering applications. Radio Technology Somfy® (RTS) allows wireless radio control of motorized applications via the RTS family of controls.

Multiple Applications

- Interior, Exterior, Residential, Commercial, Integrated solutions.

Simple Installation & Setup

- Compatible with leading industry hardware.
- Can be mounted in the bracket six different ways.
- Features a "snap-on" style connection for roller tube adaptors.
- Interchangeable power cords, or a quick connector with extension options, provide multiple power cord lengths to meet installation demands.
- Radio Technology Somfy (RTS) provides wireless commands to eliminate control wiring.
- Limits easily set using a hand-held remote.
- Suitable for tubes diameter 47mm or more (internal diameter)

Wide Compatibility

- Compatible with Somfy's full range of RTS controls and accessories.
- Users can use natural voice and app commands to control motorized products by adding TaHoma.
- Easily integrates with third-party control systems.

DESIGNED FOR SILENCE

Sonesse® 50 AC Motors

Somfy Digital Network™ (SDN) RS485

Offers an intelligent, two-way wired communication with all the benefits of the Sonesse® range.

Multiple Applications

- Interior, Exterior, Residential, Commercial, and Integrated network solutions.

Simple Installation & Setup

- Compatible with leading industry hardware.
- Can be mounted in the bracket six different ways.
- Features a “snap-on” style connection for roller tube adaptors.
- Interchangeable power cords, or a quick connector with extension options, provide multiple power cord lengths to meet installation demands.
- Limits can be set using addressable network limit settings.
- Suitable for tubes diameter 47mm or more (internal diameter).

Wide Compatibility

- Compatible with intelligent RS485 technology used with our Somfy Digital Network (SDN).
- Easily integrates with third-party control systems.

LT50 AC Motors

Standard Motors – Rapid Limit Adjustment

The LT50 AC is a standard 4-wire star head motor, an ideal choice for pre-construction opportunities while the walls are open. Control an individual shade or group of shades with a wired switch.

Installation Advantages

- Adjustable motorhead orientation installs in 6 different positions.
- Power cable is detachable at the motor head for quick replacement when necessary or to manage wire length.
- Drive wheels snap on for quick assembly.
- Rapid push-button limits allow for quick and easy setting and adjustment.
- Optional fast connectors are available in various lengths to avoid the need for an electrician.

Energy Savings

- Act for Green motor, designed to be environmentally friendly.
- Doesn't consume power in standby mode for reduced user costs.

LT50 Altus® AC Motors

Radio Technology Somfy® (RTS)

LT50 Altus is a tubular motor with no need for an electrician. Compatibility with the full range of RTS controls and accessories.

Easy Install

- Plug and play motor with no need for costly wiring.
- Interchangeable power cords, or a quick connector with extension options, provide multiple power cord lengths to meet installation demands.
- RTS provides wireless commands to eliminate control wiring.
- Limits easily set using a hand-held remote.

Comfort & Convenience

- Long range remote control doesn't require direct line of sight.
- Smartphone and tablet app available for quick and easy control even while away.
- Use natural voice commands to control RTS motorized solutions with TaHoma.

Energy Savings

- Motorized exterior screens can potentially block up to 90% of solar rays.
- Motorized rolling shutters can reduce heat gain in the summer and heat loss in the winter by up to 40%.
- Motorized retractable awnings can reduce heat gain in the summer by 77% while in use.

Protection

- Motorized retractable awnings and exterior screens not only shield occupants from the sun, but offer a cool, comfortable outdoor living space.
- Motorized rolling shutters provide a rigid protective barrier for any space and protect from storm damage.

Pergola Motors

All-Seasons Comfort Automated slat adjustment offers year-round use and protection.

More Life Outdoors Easy backyard living with a pergola powered by Somfy adds value to lifestyle and property.

Power Options RTS-compatible, wired motor for ultimate convenience.

Smart Home Integrates with other connected solutions for smart home advantages inside and out.

Technologies Available intelligent sensors automatically tilt open or closed based on weather conditions.

Pergola Motors

Radio Technology Somfy® (RTS)

A motor dedicated to tilting pergola slats to create livable space users can enjoy in any season. Operate them with LED lights or motorized screens.

Comfort & Convenience

- Easily and reliably control the tilt orientation of Pergola slats so users can maximize the use of outdoor spaces.
- Compatible with other connected solutions so users gain a smart home experience.
- Add optional rain, temperature, and wind sensors to automatically protect spaces against weather conditions.
- Mechanical or electronic end limit settings possible with the control unit.

Radio Technology Somfy® Compatible

- Wired motor compatible with the Pergola 12V/24V RTS Receiver for a complete RTS system.
- Familiar RTS protocol to mix and match control options to maximize product performance.
- Exclusive Somfy "my" feature saves a favorite/preferred product position.

Main functions

Compatible with rain, sun, & wind sensors

Rolling Shutter Motors

Storm Safety An extra layer of defense against severe weather and storm damage.

Power Options A variety of solutions to accommodate a range of needs, including solar options.

Home Protection Tamper-resistant features are a deterrent to potential intruders.

Smart Home Intelligent systems enable control even when away from home, providing peace of mind.

Sensitive to the Environment Energy-saving benefits, plus frost protection that preserves the motor in extreme weather.

Technologies Revolutionary rigid links increase performance and ease of installation.

LS40 AC Motor

Standard Motors - Progressive Limit Adjustment

The LS40 AC is a wired, 40mm motor for blinds and screens.

Easy Integration

- Thin and round head.
- Suitable for compact tubes diameter 37mm or more (internal diameter).

Easy Limit Setting

- Down and up end limits set by the progressive adjusting knob on the motor head.

Simple, Effortless, and Comfortable

- Accessible motorization to move blinds, shades, or screens effortlessly.

LS40 Altus® AC Motors

Radio Technology Somfy® (RTS)

The LS40 Altus is a universal solution for exterior & interior applications.

Wide Range of Solutions

- Compact 40mm design adapts easily to smaller shading hardware, requiring less mounting space.
- Compatible with Somfy's full range of RTS controls and accessories.

Universal Quick Connector

- Molded in white to match connector and cable colors.
- For interior and exterior IP55 (diameter 40 & 50) motors, radio and wired.
- UL recognized for a safe, easy-to-use connection.
- Plug & play extensions (no electrician needed).
- Limited motor SKUs to effectively manage inventory.
- Flexibility to manage extension lengths as needed.

LT50 Oximo™ AC Motors

Radio Technology Somfy® (RTS)

Oximo™ is a smart choice for motorizing rolling shutters. It is compatible with all types of rolling shutters and can be controlled with any Radio Technology Somfy accessory including hand-held remote controls, wireless wall switches, and timers.

Obstacle Detection

- Stops the shutter from coming down automatically when obstacles are detected to protect belongings.

Frost Protection

- Stops the motor if frost or ice freezes the shutter in place, preserving the integrity of the motor and the shutter.

Tamper Resistant

- Resists manual lifting for improved security when used with rigid links.

LT50 CMO AC Motors

Wired

The LT50 CMO is a 120V/60Hz standard tubular motor featuring compact manual override to operate manually when power is not available.

Easy to Install & Use

- Features a compact manual override (CMO) allowing operation in the event of a power failure.
- A standard 4-wire motor is an ideal choice for preconstruction opportunities while the walls are open and operation with a wired switch is preferred.
- Detachable power cable to easily manage wire length or replace if needed.
- Standard control options include wired wall switches.
- Easily set and adjust limits using rapid push-buttons.

Environmentally Friendly

- Designed to save energy.
- Doesn't consume power in standby mode.

LT50 RTS CMO AC Motors

Radio Technology Somfy® (RTS)

LT50 RTS CMO tubular motors have RTS built-in and feature a compact manual override (CMO).

Easy to Install & Use

- Premier choice for hurricane shutters and retractable awnings.
- 120V tubular motor with built-in RTS.
- Features a compact manual override (CMO) which allows users to operate the motorized application manually when power is not available.
- This motor can be plugged into a standard wall outlet or hard-wired.
- Detachable power cable to easily manage wire length or replace if needed.
- Easily integrates with most home automation systems.
- Compatible with full range of RTS controls and accessories.

LT50 AC Motors

Somfy Digital Network™ (SDN) RS485

LT50 AC motors offer intelligent two-way communication.

Multiple Applications

- Internal, External, Residential, and Commercial, and Integrated network solutions.

Simple Installation & Setup

- Compatible with leading industry hardware.
- Can be mounted in the bracket six different ways.
- Features a “snap-on” style connection for roller tube adapters.
- Customizable power cord lengths based on installation requirements.
- Limits may be set using progressive screw adjustment buttons, a radio transmitter, or addressable network limit settings.

Easy Integration

- Suitable for tubes diameter 47mm or more (internal diameter).
- Removable cable.

Wide Compatibility

- Compatible with the Somfy Digital Network (SDN).
- Easily integrates with third-party control systems.

LT50 AC Motors

Standard Motors – Rapid Limit Adjustment

The LT50 AC is a standard 4-wire star head motor, an ideal choice for pre-construction opportunities while the walls are open. Control an individual shade or group of shades with a wired switch.

Installation Advantages

- Adjustable motorhead orientation installs in 6 different positions.
- Power cable is detachable at the motor head for quick replacement when necessary or to manage wire length.
- Drive wheels snap on for quick assembly.
- Rapid push-button limits allow for quick and easy setting and adjustment.
- Optional fast connectors are available in various lengths to avoid the need for an electrician.

Energy Savings

- Act for Green motor, designed to be environmentally friendly.
- Doesn't consume power in standby mode for reduced user costs.

LT50 Altus® AC Motors

Radio Technology Somfy® (RTS)

LT50 Altus is a tubular motor with no need for an electrician. Compatibility with the full range of RTS controls and accessories.

Easy Install

- Plug and play motor with no need for costly wiring.
- Interchangeable power cords, or a quick connector with extension options, provide multiple power cord lengths to meet installation demands.
- RTS provides wireless commands to eliminate control wiring.
- Limits easily set using a hand-held remote.

Comfort & Convenience

- Long range remote control doesn't require direct line of sight.
- Smartphone and tablet app available for quick and easy control even while away.
- Use natural voice commands to control RTS motorized solutions with TaHoma.

Energy Savings

- Motorized exterior screens can potentially block up to 90% of solar rays.
- Motorized rolling shutters can reduce heat gain in the summer and heat loss in the winter by up to 40%.
- Motorized retractable awnings can reduce heat gain in the summer by 77% while in use.

Protection

- Motorized retractable awnings and exterior screens not only shield occupants from the sun, but offer a cool, comfortable outdoor living space.
- Motorized rolling shutters provide a rigid protective barrier for any space and protect from storm damage.

Controls & Sensors

Somfy® offers a wealth of experience in control and sensor systems that simplify the experience for the user and help to ensure greater efficiency, comfort, performance, and cost-savings in virtually any building type.

Wireless Technologies	272
Intelligent Controls	276
Controls	281
Sensors	323

Wireless Technologies

Somfy provides a variety of easy-to-use and easy-to-install motor and control solutions to fit every consumer — residential or commercial — regardless of need or budget.

RTS Technology (Radio Technology Somfy®)

With one-touch simplicity, RTS controls send out a radio wave signal to move any motorized interior window covering or exterior pergola, screen, awning, or rolling shutter.

- RTS is omnidirectional and operates reliably at 20 feet (up to 65 feet under optimal conditions).
- The control signal carries commands one way from controller to motor.
- Up to 12 programmable control devices and three sensors can control a single RTS motorized application.
- Users can operate controllers to raise/open window coverings, to lower/close them, or to move them to a pre-programmed favorite “my” position.

Somfy hand-held RTS remote controls are sleek, easy to program, easy to use, and offer easy portability for total control from any spot in the room.

Somfy RTS wall switches are totally wireless, install quickly with no need for an electrician, and are available with multi-channel functionality to easily control multiple motors.

RTS sensors provide information on interior and exterior conditions in real time to controllers, enabling them to adjust shading as needs change.

All Somfy RTS controllers are designed to work together seamlessly so users can enjoy the simplicity of a wall-mounted switch or the portable convenience of a remote — whatever suits the moment.

TaHoma® app-based systems offer simple, intuitive control of motorized systems using a smart device from virtually anywhere that has an internet connection.

All Somfy RTS motors are designed to work seamlessly with Somfy RTS control and sensor systems. To ensure compatibility, simply look for the RTS (Radio Technology Somfy) emblem.

Zigbee® 3.0 Technology

Zigbee is an open, forward-looking protocol that offers outstanding flexibility and ensures future compatibility with other certified products. It allows bi-directional communication, so the user can send commands from anywhere and receive real-time feedback on equipment status, battery level, and more to help provide peace of mind.

Zigbee 3.0 creates its own smart ecosystem, which enables Somfy products to easily communicate with each other and allows control from a single source. The technology is very reliable and stable; it avoids interference from other devices during installation and use. And as a mesh network, it gains strength as more constantly powered devices are added to the system. It's innovation that provides the comfort of seamless control.

Somfy is a Connectivity Standards Alliance board member and is proud to be part of a community recognized as the world leader for interoperable smart products. All Zigbee 3.0 products are cross-compatible and easily work together, including smart lighting, smart shades, security systems, and HVAC systems.

Intelligent Controls

To meet the needs of designers, builders, building owners, management, and clients, Somfy offers intelligent control and real-time sensor systems that are compatible with most common industry technologies — including networked control systems using either Power over Ethernet, digital technology, or direct control using analog electronics.

Power Over Ethernet (PoE)

Integrating Somfy motors and controls into Power over Ethernet (PoE) systems distributes network signals and power to transmit communication over standard network cabling to shades and draperies.

Using PoE in new construction or renovation projects can lower infrastructure costs and capital expenses by eliminating wall circuits for endpoints and consolidating continuous power supply systems. It saves deployment time by reducing the stages of construction and installation. Using PoE technology also helps save on energy costs via Cisco energy-management systems and improves performance with intelligent load-shedding capabilities.

Somfy Digital Network™ (SDN)

The Somfy Digital Network (SDN) is a bi-directional RS485 network that provides control of, and continuous feedback from, each motor on the network. This allows the ability to view the position and status of any motor on the network in real time.

SDN runs over standard network architecture, allowing users to establish a remote connection to the system from anywhere with internet access. It works either as a stand-alone option or including animeo® IP, with different control options for each.

0-10V to SDN Interface

Available with Somfy Digital Network (SDN) devices, the 0-10V to SDN Interface accepts lighting control dimming commands to operate Somfy RS485 motors. It offers “plug and play” operating simplicity as a shade-control device by controlling all motors without additional programming.

- It converts 0-10V analog inputs to broadcast SDN commands, controlling motors from most lighting control systems.
- 0-10V to SDN integration can be used in multiple ways — group control of a small SDN system can be started by an SDN 0-10V interface, or an SDN or animeo IP system could receive commands from a 0-10V input similar to keypad controls.

All Somfy Digital Network (SDN) motors are all designed for compatibility and bi-directional communication with SDN controls, interfaces, and sensors. Look for the SDN logo when ordering.

animeo IP

Somfy animeo IP is an automated natural light management system utilizing Somfy-powered intelligent motorized window coverings, as well as digital keypads and weather sensors. The system's controllers, sensors, and keypads work with both new and existing SDN motor installations, allowing comprehensive solar management as a stand-alone solution or integrated into third-party control systems.

An intuitive user interface allows for simplified commissioning, building management, and technical support featuring drag-and-drop programming, motor auto-discovery, and at-a-glance real-time system status updates.

animeo IB+

The animeo IB+ Touch Building Controller is a simplified, intuitive control interface for small and medium-sized buildings that provides sophisticated design, a user-friendly graphical interface, and customized functionality, all at the user's fingertips. It features a built-in "co-pilot" that offers end users a step-by-step guide, real-time sensor integration, and easy maintenance.

- Scalable number of configurable zones for any project, in series of four or eight zones per unit
- Applicable for shades, blinds, screens, rolling shutters, and window openers
- Glare control for optimal visual comfort as the sun moves across the sky
- Automatic retraction of exterior window coverings for protection in case of high winds, frost, or fire
- Data storage for tracking events, settings, sensor values, etc. for three months
- Multi-unit interaction with a single weather station for consistent automation throughout the building

Wired Technology

Somfy's wired control systems offer a cost-effective solution that is typically used for applications requiring small to large torque ranges in new construction, or for retrofits where wiring can be run without difficulty.

We provide a variety of individual control options utilizing dry contact (DCT) or wired switches for commercial building systems. The motor options available for wired technology are durable, dependable, and feature a wide range of torques and speeds for interior or exterior motorized shading applications.

The Somfy Individual Group Control (IGC) 4n1 Motor Controller is a scalable wired device that enables individual and group control for up to four Somfy® Wired Technology (WT) motors. It allows three intermediate positions per motor, preset at 25%, 50%, and 75% openness, or users can set custom intermediate positions with a DecoFlex Dry Contact Keypad. Daisy-chaining multiple 4n1 controllers together allows simple, synchronized control from a single keypad.

Sensor Systems

Somfy offers a variety of sensor devices designed to integrate and communicate with commercial building control systems. These sensors detect and measure exterior conditions — such as sun intensity, temperature, wind, and moisture — and deliver real-time data to building controllers, allowing them to adjust shading systems to suit current conditions throughout the day.

[illegible]

Controls

Customized Control Operate multiple shades, awnings and screens for ultimate control.

Smart Home Compatible with Amazon Alexa, Google Assistant, Samsung SmartThings, and most third-party systems.

Flexibility Variety of control options to fit any user preference, including handheld transmitters, wireless wall switches, app control, or a combination.

Coordinated Control Operate motorized products along with lights, thermostats and other connected devices.

Intelligent Building Control Scalable for large commercial facilities, with centralized, individual or group controls.

Zigbee® Controls

Wireless Integrated App Controls

The TaHoma® switch can control up to 60 Somfy Zigbee products and 40 channels of Radio Technology Somfy® (RTS) motorized products. The TaHoma® app enables users to setup and configure their products, and access their smart shading from anywhere.

TaHoma also enables integration with third-party control systems by leveraging the Somfy Synergy™ API.

Streamlined Smart Shading Offer

- Somfy motors fitting nearly any interior style of shades, blinds or draperies.
- TaHoma® pro app for simpler fabrication, motor setting, and installation.
- TaHoma® switch smart hub for a solid, reliable network.
- TaHoma® app giving homeowners the ability to connect, control, and customize.
- Ysia remote for direct control of window coverings.

Pro Tools Make it Easy to Set Up using an App!

- Simple: Each motor has a QR code that can be scanned for a one-to-one connection over Bluetooth, no crosstalk that can slow down a production line or installation process.
- Intuitive: With a step-by-step process to configure motor settings and set end limits, manufacturers save time training new and current production staff.
- Self-Contained: With the entire configuration set from the app, you'll avoid the complicated button dance that requires memorizing or referring to extensive setup documentation.
- Hassle-free: Easier and less time-consuming to set up the network or adjust limits.

Comfort-Driven Ecosystem

- Ease production without slowing down manufacturing and productivity.
- Every installation done in less time, the first time.
- Peace of mind that smart shades, blinds, or draperies will work seamlessly with any future change in smart home tech.
- Join up to 10 TaHoma interfaces for multi-zone control (RTS).
- Offer users voice control with Amazon Alexa, Google Home, and Apple Home (where applicable for Zigbee products only).
- **Apple Home compatibility is only supported for TaHoma switch used with select Zigbee technology motors. See motor specifications for details.**

RTS LED Receivers & Cables

The RTS 24V Dimming LED Control makes it easy to add lighting to RTS motorized awnings.

Convenient

- Convenient solution for adding LED lighting to Somfy motorized awnings.
- Operate and adjust the lights with the same control as the awning.
- Smartphone and Tablet app compatible via TaHoma for quick and easy control.
- Allows for 12 levels of brightness and features the Somfy "my" position to set a preferred lighting level.
- Situo 5 Variation RTS recommended for precise 12-step dimming control.
- Simplify wiring using 500 series RTS motors equipped with fast connectors, such as Sunea.

Easy Installation

- A plug and play kit that installs quickly and easily without the need for an electrician.
- Available as a turn-key kit including a receiver and 4 customizable LED light bars that suit any lighting requirement.
- LED bars available in warm or cool white can be mounted on top of the awning arms for ambient or muted light, or face down for stronger light.

Compatibility

- Compatible with full range of RTS fast connector motors and controls.
- Ideal for new or existing installations.
- Compatible with 24V LEDs using 5.5x2.5mm barrel connectors.

Pergola Controls

Radio Technology Somfy® (RTS) Receivers

Receivers add RTS control to two pergola tilt motors to seamlessly integrate with RTS transmitters, sensors, home automation interfaces, and smart phone apps.

Highlights

- Supports 12V or 24V DC.
- Built-in and remote antenna options ensure reliable radio reception.
- Compatible with RTS controls, sensors (Eolis 24V, Ondeis® 24V, Ondeis® WireFree, Sunis Outdoor WireFree™ RTS), and accessories (LED light kit).
- Select open or close in high winds with adjustable 12 to 60mph wind trigger from wind sensor built-in temperature sensor
- Rain sensor available in wired and solar-powered wirefree versions
- Wirefree sun sensor
- Supports motors with and without encoders.
- Full and semi-automatic limit setting (allows installer to set one limit to control stroke length).
- Consistent, simple, reliable RTS programming.
- Includes overload and over current protection.
- Obstacle detection protects objects & investments
- Users can set a favorite intermediate "my" position.

Drapery Integration

Z-Wave®

The Z-Wave Module allows communication between Somfy's drapery motors and Zigbee controls. It receives Z-Wave transmissions and converts them to motor control commands. They've never been easier to integrate in third-party automation systems!

Integration Features

- Receives Z-Wave® transmissions and converts them to motor control commands.
- Join a network with one button press.
- Connects directly to the motor for power.
- One interface per motor.

Connectivity

- RJ12 Modular cable for communication.
- Setup button easily identifies the module in the Z-Wave network.

Compatibility

- Compatible with Glydea® DCT motors.
- Compatible with Irismo™ DCT motors.

Integration Controls: UAI+

The Somfy Connect™ Universal Automation Interface (UAI) Plus allows for commissioning and integrating Somfy Digital Network™ (SDN) over IP.

User Friendly

- Setup wizard for commissioning (programming).
- Drag and drop grouping.
- Firmware updates over IP.
- Available reports can be printed or emailed.
- Configuration file can be backed up.

Integration features

- Commission and integrate up to 250 motors over IP.
- Embedded programming software.
- No pinouts.
- No converters.

Connectivity

- Compatible with Control4, Crestron, and Savant automation systems.
- Compatible with Somfy Synergy™ API.
- Compatible with SDN 2.0.

Compatibility

- Compatible with Sonesse 30 RS485.
- Compatible with Sonesse 50 ULTRA AC & DC RS485.
- Compatible with Glydea ULTRA.
- Compatible with Irismo 35 with SDN Enclosure Kit.

Digital Intelligent Building Controls

Integration Controls: 0-10V Interfaces

The SDN 0-10V Interface is a device which accepts the lighting industry standard 0-10V analog dimming signal and converts it to an SDN or animeo® IP command to drive a single or a group of motors. The control is housed in a junction-box-mountable, plenum-rated enclosure and powered by line voltage. There is a single RJ45 jack on the device which provides the connection to the SDN bus via a standard CAT-5 cable.

Occupant Experience

- Simplified user interaction for controlling natural and artificial lighting.
- Coordinated control with lighting controls via schedules and scenes.

Building Performance

- Enables large scale deployments with integration to BMS and security systems.
- Flexibility to add animeo IP for advanced scheduling and sun tracking capability.

Ease of Installation

- Powered by line voltage to eliminate the need for local power drops for outlets.
- Plenum-rated enclosure that can be installed in J-box along with a lighting control device.
- Onboard DIP switches streamline system configurations and speed up deployment.

Digital Intelligent Building Controls

Integration Controls

The Somfy Connect BMS Interface V2 for Somfy Digital Network™ (SDN) provides communication between Building Management Systems and Somfy motorized shading systems, either stand-alone SDN or SDN with an animeo IP shade systems.

Integration Features

- Integrates with Modbus, BACnet MS/TP, and BACnet IP.

System Control Features

- **animeo IP**
 - Control individual or motor groups, sensors, and virtual keypads.
 - Types of control include position (%), up/stop/and down commands, priority control, and sensor data.
- **Virtual Keypads**
 - Control individual or motor groups.
 - Types of control include position (absolute), up/stop/and down commands, and intermediate positions.
- **Stand-alone SDN**
 - Control individual or motor groups.
 - Types of control include position (absolute), up/stop/and down commands, and intermediate positions.

Trouble-Free Setup

- Supports up to 4500 device objects.
- Programmable through a user-friendly interface.
- The device is auto-discoverable when set up in animeo IP systems.

Compatibility

- Compatible with Sonesse 30 & 50 AC RS485 motors, and animeo IP systems.

Power over Ethernet (PoE) Gateway

The SDN Power over Ethernet (PoE) Gateway is a low-voltage power distribution and network-connected module that utilizes PoE technology to power and control Somfy 24V RS485 shade and drapery motors.

Highlights

- Delivers up to 51W of power and ethernet-based connectivity.
- Supports both Somfy Synergy™ API and CoAP Digital Building API compatible with Molex Transcend Network Connected System.
- Powered and connected via standard Cat 5e/6 UTP cable and controls Somfy Digital Network™ (SDN) devices.
- Control up to 4 Low-voltage RS485 motors from an SDN PoE Gateway.
- When operating motors in a group, motors will cascade individually.
- Aligned operation available with Sonesse® 30 RS485 DC (maximum 2 motors).
- Total wiring between SDN PoE Gateway and all motors should not exceed 240 ft. when using SDN Low-Voltage Motor Cable.
- Gateway connects to SDN Low-Voltage Motor Cable using a 4 pin to Weidmueller adaptor cable (included with the Somfy PoE Gateway Kit 1870445).

Integration Features

- Compatible with Molex Transcend Control System, distributes power and data to shade and drapery motors.
- IEEE 802.3bt and Cisco UPoE Compliant Device.
- Ability to program up to 16 intermediate positions per motor.
- Offers a control for groups of motors with stop and align command.
- Compatible with Somfy Synergy™ API.

Connectivity

- Capable of powering a single or multiple motors.
- Easy to connect/disconnect RJ45 and 4 pin ports with adaptor cable included.
- Supports both ANSI/TIA/EIA 568 A & B Standards.
- Safe operation and industry-standard compliance (UL 2108/ UL 1310).
- Not allowed to be on the same subnet as Molex Gateways.

Motor Compatibility (24V DC RS485 only)

- Compatible with Sonesse 30 RS485 DC, Sonesse 50 Ultra DC RS485, and Irismo 35 DC RS485.

Power over Ethernet (PoE) Room Controllers

The PoE Touch Panel Room Controllers are touch screen interfaces that send commands, receive position status, and allow the grouping of SDN motors connected to POE Gateways. These products utilize native PoE technology to power and control the Somfy 24V RS485 motors.

Operation Features

- Control up to 20 Gateways, individually or as groups, for ideal room control.
- Provides dedicated control for the Power Over Ethernet (PoE) network for motorized shading and drapery.
- Offers group control of multiple gateways with common up, stop, down, and percentage commands.
- Ability to program up to 6 intermediate positions per motor or groups of motors or gateways.
- Includes a Proximity Sensor allowing the product to wake up when motion is detected.

User Experience

- In-wall touch panel offers a robust, hi-res color display dedicated to control SDN (Somfy Digital Network™) motorized shading connected to PoE Gateways.
- Intuitive two-way communication provides position status feedback with network access.
- Offers multiple display settings, including a screen saver upload, to customize the user experience.

Connectivity

- Connected via standard Cat 5e/6 UTP cable with a max. distance of 328 ft. between PoE Touch Panel Room Controller and network switch for reliability.
- Easy to connect/disconnect RJ45 port supporting both ANSI/TIA/EIA 568 A & B Standards.
- Includes Micro USB port for additional functionality including file transfers to and from the device.
- Safe operation and industry-standard compliance (UL Certified, CE, RoHS/WEEE & FCC Class B).

Product Compatibility

- Installs in standard single-gang wall boxes US, UK, European/International IEC/EN60670.
- IEEE 802.3af Compliant Device allowing for use with industry standard IEEE 802.3af PoE Network Switches.
- Requires Somfy Power over Ethernet Gateways for use.

Somfy Digital Network™ (SDN) PowerConnect™ Surface-Mount Panel

The SDN PowerConnect Surface-Mount Panel is a Somfy Digital Network™ (SDN) bus distribution component used to add 10 isolated motor ports and two isolated device ports to an SDN bus segment.

Efficient Power and Data Distribution

- Isolated motor ports support up to 240 feet of power and data wiring to individual low-voltage intelligent motors.
- Used to add 10 isolated motor ports and two isolated device ports to an SDN bus segment.

Improved Design

- New mounting options add flexibility to installation.
- Smaller form factor — approx. 50% smaller volume.
- Sequence button allows for testing of motor wiring directly at the power panel.
- System status LEDs monitor Bus power, communication, and end-of-line notification.
- Supplies power to Device Ports from internal power supplies.
- Miswire protection.
- Automatic segment termination.
- Replaces all previous motor power panels for SDN motors.

Simplified Installation

- The in-wall or on-wall mountable enclosure offers separated line- and low-voltage areas for ease of installation.
- Front cover includes keyed lock handles.

Perfect for Multiple Applications

- Could be used in small SDN systems with two control devices and 10 individual motors as a stand alone solution.
- cULus

Somfy Digital Network™ (SDN) PowerConnect™ Rack-Mount Panels

An SDN bus distribution device used to add eight isolated motor ports and two isolated device ports to an SDN bus segment per panel.

Efficient Power and Data Distribution

- Supports up to 240 feet of power and data wiring to Somfy's range of low-voltage SDN motors.
- Enables control of eight RS485 DC motors per panel.
- Provides power to SDN device ports from internal power supplies (add a bus power source when adding a Data Hub or other bus-powered device connected to the bus line).
- Two device ports isolated from the SDN bus.

Improved Design

- Single and dual kit options add flexibility to installation.
- Sequence button allows for testing of motor operation directly at the power panel.
- Includes bus segment status LEDs for power, activity and end of line notification.
- Protects system components from mis-wire.

Somfy Digital Network™ (SDN) Push-Button Switches

Provides a hard-wired, in-wall user interface for stand-alone Somfy Digital Network™ shading systems.

Simple communication

- SDN keypads communicate directly with intelligent motors without a centralized controller.
- Distributes intelligence across the network to ensure ensuring reliable operation.
- Eight dry contact inputs (regardless of the number of buttons) which are programmed to output SDN commands.

Simple to use

- Compatible with Set pro by Somfy configuration software.
- Each button can be programmed with different commands for Press, Release, and Hold.
- Set an intermediate position at the current shade position via a simple button press.
- Keypad configurations can be exported and backed up.

Digital Intelligent Building Controls

animeo® IP Building Controllers

The animeo IP Building Controller features a sophisticated graphical user interface and built-in software applications for managing scheduled events, sun tracking, and virtual web-based keypads. An animeo IP Building Controller is required for every animeo IP installation. For larger animeo IP systems (over 200 nodes), animeo IP Sub Controllers must be used.

Installation Advantages

- For larger installations, the IP Building Controller’s capacity can be expanded with the addition of an animeo IP Sub Controller (Ref. 1860201).
- RJ45 and spring clamp connectors for false prove connections.
- Suitable for wall-mounting and DIN-rail installation.

Functional Advantages

- Features an intuitive graphical user interface to simplify programming, commissioning, operation, and system status.
- Automatic discovery of blinds, sensors, and local control points.
- No zone limitation, a window can be a single zone.
- Allows configuration and binding of customized web remotes.

Group Motor Controllers

The Individual Group Control (IGC) 4n1 Motor Controller provides individual and group control for up to four Somfy Wired Technology (WT) motors with up to three intermediate positions per motor.

Features Summary

- Control up to four wired motors individually or in groups.
- Provides default intermediate positions: 25%, 50%, 75% openness.
- Users can access 3 preset positions as well as Up, Down, and Stop, and set custom intermediate positions.
- Multiple IGC 4n1 Motor Controllers can be daisy-chained together for simplified synchronized control from a single keypad.

Sensors

Convenient Comfort Wind, sun and rain sensors maximize product performance.

Touch-free Protection Rain or shine, outdoor sensors activate exterior products automatically.

Energy Savings Beat the heat of intense sunlight automatically.

Commercial Systems Multiple sensors for all weather conditions, used in combination, for total building efficiency.

RTS-compatible Wireless and easy to install for automated control.

Wireless Radio Technology Somfy® (RTS) Controls

Outdoor Wind Sensors

The Eolis 3D WireFree™ RTS Wind Sensor is a wireless, battery-powered wind sensor that will automatically retract an awning based on wind generated movements.

Easy Install

- Completely wireless, battery operated.
- Recommended for existing or new awning installations.

Peace of Mind

- Exclusive patented technology to protect awnings against the wind by detecting horizontal, vertical, and lateral movement.

Radio Technology Somfy

- Compatible with all RTS-powered systems, controls, and accessories so users can mix and match options to maximize product performance.

SOLIRIS RTS SUN AND WIND SENSOR 24V DC KIT (INCLUDES SENSOR AND TRANSFO-MER)	RTS 433 MHZ	9012500

Wireless Radio Technology Somfy® (RTS) Controls

Outdoor Rain & Sun Sensor

The Ondeis WireFree RTS Rain & Sun Sensor is a solar-powered combined rain and sun sensor compatible with RTS motorized exterior products, including awnings, rolling shutters, and screens. The Sensor is completely wireless and uses optical rain-sensing technology to measure rainfall, then sends an RTS command when rainfall exceeds the user-selected threshold. The Sensor also utilizes a sun-level sensor that sends an RTS command when sunlight exceeds the user-selected threshold.

Flexible and Easy to Install

- One channel communicates with one RTS motorized product or group of motorized products.
- Two-way mounting bracket allows for multiple mounting options - flexible and simple installation on the wall, pole, or gutter, using provided hardware.
- Demo Mode reduces response time for testing.
- Potentiometer allows users to set threshold levels for rain and sun sensing and easily adjustable preferred settings.
- LED Indicators provide visual feedback of product functions with easy-to-see confirmations.
- Mode Selector sets usage for an awning, exterior screen, or a rolling shutter.

Communication

- Sends a signal to the motor regularly to ensure a maintained connection.
- Operates even if the signal is lost, protecting the motorized application.

Main functions

- Outdoor rated
- Time-saving
- Easy-to-use
- Easy integration
- Scalable
- Customizable

ONDEIS® WIREFREE RTS RAIN & SUN SENSOR	RTS 433 MHZ	9019617

Wireless Radio Technology Somfy® (RTS) Controls

Outdoor Sun Sensor

This battery-operated, outdoor sensor automatically adjusts Somfy powered exterior products based on the sun's intensity.

Compatibility

- Compatible with RTS motors & receivers.
- A Situo Soliris is required to activate the sun function.

Effortless Comfort & Protection

- Provides effortless control so users can enjoy awnings, screens, or pergolas even more, automatically making patios more comfortable.
- Optimizes HVAC usage and keeps the home comfortable, allowing energy savings throughout the year.
- Prevents UV damage & protects interior furnishings by managing exterior shading solutions based on the sun's intensity.

Customized Solar Protection

- Choose from eight levels of sun threshold settings for a personalized experience.

Pergola Sensors

Pergola Sensors

The Eolis RTS Wind Sensor automatically retracts an awning based on wind-generated movements.

Comfort & Convenience

- Automatically operates pergolas, exterior screens, or rolling shutters when the wind is detected.

Peace of Mind

- State-of-the-art sensor automatically offers maximum energy savings and protects the application.

Digital Intelligent Building Controls

animeo® Building Automation Sensors

Sensor boxes act as an interface between weather stations and building controllers. Measurement values are evaluated and sent to the building controller. It requires an external 24V AC/DC power supply.

Safe & Convenient

- Only two cables (power and data) lead to the outside.
- Lightning protected for safety.
- Can be fixed to the Sensor Station mast.
- Operates up to 8 sun sensors, 2 wind sensors, 1 wind direction sensor, 1 rain sensor, and 1 outside temperature sensor.
- Easily connect a DCF plug module.
